

## **Specialty Photography and Albums**

### **This Is Your Day Album**

This specialty album is designed to record the experiences of a person (or family) throughout an entire day – birthday, graduation, recital, reunion, anniversary, vacation etc. All events unique to the day are recorded.

The images are then processed for optimum color, exposure and composition and either (or both) a digital or printed album is created.

### **Family Favorites Album**

Another idea for a special album – a Family Favorites Album. This would include taking your favorite images of the family (photos, slides, or negatives), scanning these images and creating either a digital or printed album.

### **Children's and Family Album Plan**

You may want to consider images of your child and/or family on a regular basis. These plans are for those just starting their families. Periodic images are taken, processed and added to a digital or printed album. Both digital and printed albums are designed so that pages can be added (up to 30 pages/album).
